Forecast for Wednesday 09 Aug 2023

Weather: Dry with clear spells overnight. A fine start with bright or sunny spells, then increasing amounts of high cloud during the morning making the sunshine hazy. Cloud thickening through the afternoon, perhaps with some patchy light rain or drizzle later.

Chance of cloud-free hill tops above 600m: 90% or more perhaps becoming 40% from late afternoon.

Low Cloud and visibility: Largely clear skies during the early hours. Areas of cloud developing later in the afternoon into the evening, perhaps with bases 400-500m. Visibility mostly good or very good, although perhaps very poor later in low cloud covering the hills.

Meteorologist's View

UV levels moderate in bright or sunny spells, so sun protection is advisable. Low cloud later across summits may give some navigational issues.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 08 Aug 2023	3.4mm	12mm	12.8mm

Forecast for Thursday 10 Aug 2023

Weather: Areas of low cloud lingering overnight although conditions become mainly dry. Low cloud will quickly clear in the morning to give a generally dry day with bright or sunny spells and feeling much warmer. Thicker cloud and outbreaks of rain may reach the park from the west around midnight, perhaps with the odd heavier burst.

Maximum wind: Southerly 10mph gust 15-20mph

Chance of cloud-free hill tops above 600m: 40% at first, otherwise 90% or more.

Low Cloud and visibility: Areas of cloud should be comfortably above summits for much of the day, after overnight areas of low cloud clear quickly after sunrise. Thicker cloud could again lower onto the highest summits around midnight. Visibilities generally good or very good outside of these areas of low cloud.

Temperature: **Valleys:** Plus 14 degrees Celsius rising to Plus 24 degrees Celsius.
At 600m: Plus 12 degrees Celsius rising to Plus 19 degrees Celsius.
Freezing level: Above summits.
